## CAREER OBJECTIVE

I am a detailed Full Stack Developer that is very heavy in experience on the Front End with HTML, CSS and Javascript and have just polished up my education on the Back End with Python and Django as well as some React for the front. I am looking for a Full Stack position with a company where I can spread my wings and become an asset as part of a team making a difference in the world through solving solutions through code.

## TECHNICAL PROFICIENCIES

HTML, CSS, Javascript, React, Redux, Vue, Express, Node, PHP, Mongo DB, Python, Django, MySQL, PostgreSQL, REST API's, LAMP Stack, MERN Stack, E-Commerce, Wordpress, BootStrap, GIT, NPM, Agile Workflow, Graphic Design

## EXPERIENCE

### **Kenzie Academy - Software Engineering Base Training**

#### **Oct 2019 to Oct 2020 - REMOTE**

- Experience in object-oriented programming; developing, testing and debugging code; designing interfaces; and building efficient business solutions in an Agile Environment.
- Worked with remote teams of 5 to 10 using Slack, Zoom, GitHub, in order to meet deadlines and requirements for projects such as a full stack Twitter clone where I utilized React and Redux on the Front End and a Swagger OpenAPI on the Back End deployed via Heroku. Another fun application I built was a Javascript application utilizing Restful API's to track the space station on a world map in real time. My most recent projects have been utilizing a React Front End and a Python API Backend. I also utilized a SQLite backend with a Django Front End.
- Completed assignments involving virtual environments, unit testing, object-oriented programming, building and connecting to 3rd party Restful API's, web requests, and user authentication systems.

### **Kenzie Academy - Software Engineering Tutor**

#### **Jan 2020 to present - REMOTE**

- Tutor students thru assignments involving virtual environments, unit testing, object-oriented programming, building and connecting to 3rd party Restful API's, web requests, and user authentication systems.
- Tutor students one on one daily as well as groups of 5-10 students thru curriculum involving Javascript, Node.js, React, Redux and Python, and Django as well as debugging and TDD.

### **High Altitude Designs, Woodland Park, CO - Web Applications Developer**

#### **Jan 2009 to 2019 - REMOTE**

- Design web applications graphics and UI's, utilizing Adobe Software Suite.
- Develop websites utilizing HTML, CSS, PHP and Javascript on various platforms including Wordpress and Joomla.
- Design Logos, Brochures, Product Labels, Business Cards, etc... for customers via Adobe Photoshop and Adobe Illustrator.
- Provide Customer Service and Account Management.

## **HIT Web Design, Provo, UT - Web Applications Developer**

**Jan 2007 to June 2011- REMOTE**

- Designed web applications graphics and UI's, utilizing Adobe Photoshop.
- Developed websites utilizing HTML, CSS, PHP and Javascript on various platforms.
- Designed Logos for customers via Adobe Photoshop and Adobe Illustrator.
- Designed and developed Flash Elements and Banners via Adobe Flash.
- Provided Customer Service and Account Management.

## **Land Properties, Salida, CO - Licensed Real Estate Agent**

**February 2007 to June 2012**

- Marketed river front mountain properties in Colorado and ocean front properties in Belize online and in print.
- Regular office shifts where I provided information and property tours to walk in clients.

## **EDUCATION**
